- » *Front-Wheel Drive*
 - » *Power Disc Brakes*
 - » *Independent Front and Rear Brakes*
 - » *Foot Operated Emergency Brake*
 - » *Life-saver CIT-SAFE® Steering Wheel and Dash*
 - » *Lowest center of gravity*
 - » *Total Visibility*

Citro-matic® Air-Oil Suspension :

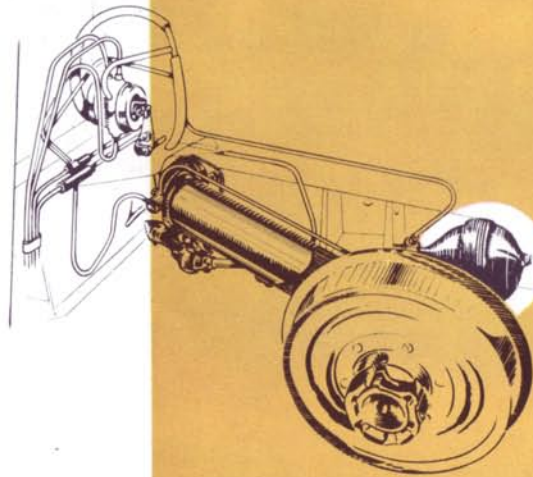

Citroen, long a leader in Europe, is originator of a host of automotive "firsts." In 1934 Citroen introduced on a regular production car full torsion-bar suspension, front wheel drive and one piece body frame construction.

In 1954, after years of study, Citroen began production of the sensational **CITRO-MATIC® Air-Oil Suspension** which was fitted as standard equipment to the rear of the famous "15-6 cyl." model. This million of miles test confirmed the highest expectations, and is now standard equipment on all four wheels of the DS19, thus eliminating conventional springs or torsion bars. Now a car *literally floats on air over the road.*

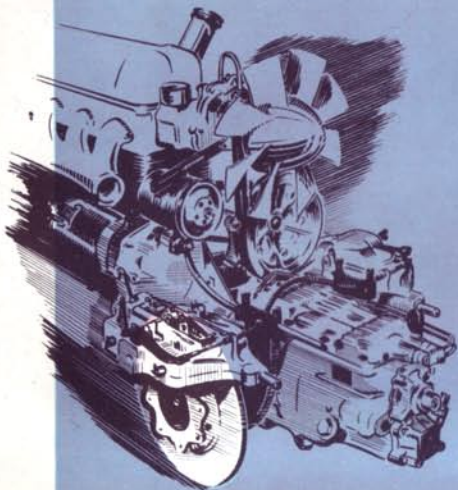

Roadability !

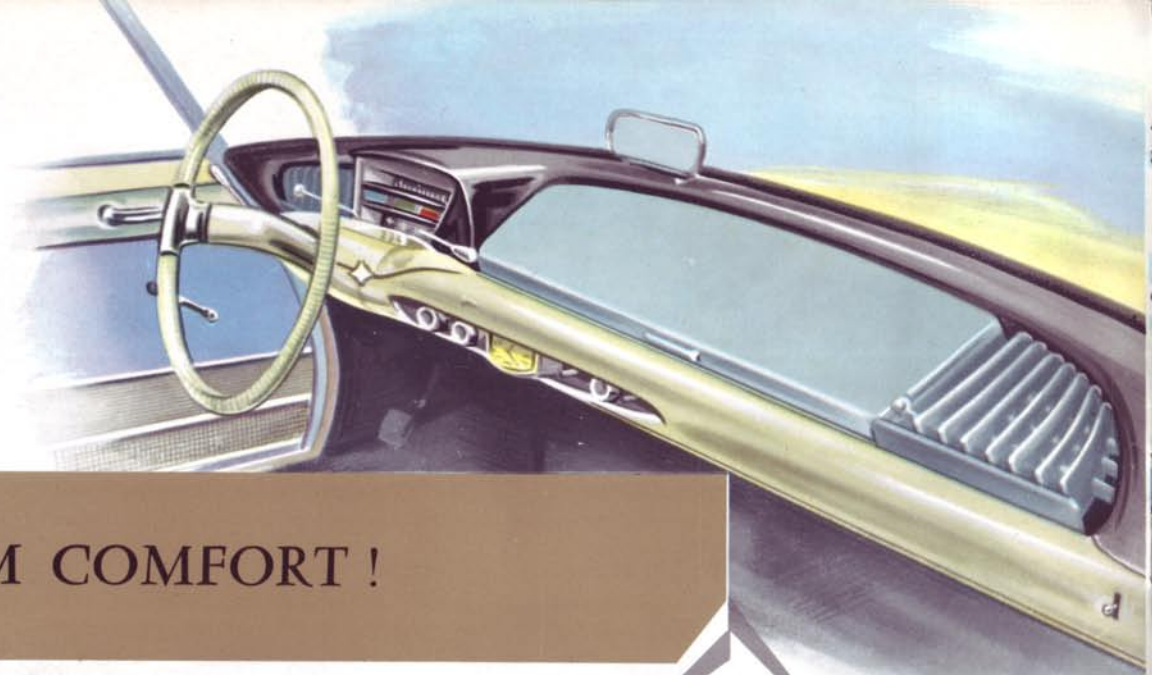

The reputation of Citroën roadholding has been known throughout the world for over thirty-five years. To the superb roadability given only by Front Wheel Drive now is added the safety and comfort of **CITRO-MATIC[®] Air-Oil Suspension**. One of many great features of this suspension is the fact that the car maintains an even keel at all times whatever the load, whatever the conditions of the road.

Revolutionary power disc brakes !

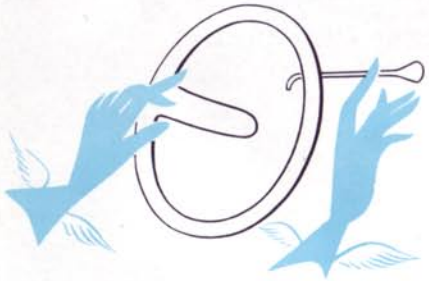

For the first time Power Disc brakes become **standard equipment** on a production automobile. The new DS19 features full power brakes — the disc brakes on the two front wheels and conventional drum brakes on the rear. The braking is progressive, powerful, as well as easy and smooth in operation ...completely free of fading and overheating.

LIVING ROOM COMFORT !

Because of the CITRO-MATIC[®] Air-Oil Suspension, you find the utmost in comfort. One finds complete comfort and ease in the chair-height seats, perfect visibility and easy relaxation thanks to full power steering.

Full power equipment :

Automatic Clutch : By eliminating the clutch pedal, the work of shifting gears is now reduced to a simple finger-tip controlled selector. You simply flick the selector, and the hydraulic clutch does the work for you.

Power steering : Full Power Steering is incorporated as an integral part of the basic design. It combines the effortless ease of full power... yet retains the "road-feel" so necessary for safety.

Power Jack : No longer is it necessary to work clumsy old fashioned bumper jacks. Simply move the suspension lever with one finger and the car lifts itself automatically.

Total visibility: Wrap-around windshield, thin corner pillars, full-width rear window and frameless door-windows, give a most extensive field of vision.

Seats: Reclining seats, center and side arm rests, generous leg-room all round, buoyant foam rubber cushions provide luxurious comfort. Washable nylon jersey upholstery.

Heating and ventilation: Very efficient heating (front and rear). From the elegant grills located on either side of the dashboard, filtered fresh air conditions the atmosphere to suit each passenger.

Dash-board: One-spoke CIT-SAFE® steering wheel without a central shaft (safety feature) permits a faster reading of the dash-board. There is ample room in the glove compartment, even with the installation of a radio. Four indirect lights provide ample illumination for writing at night.

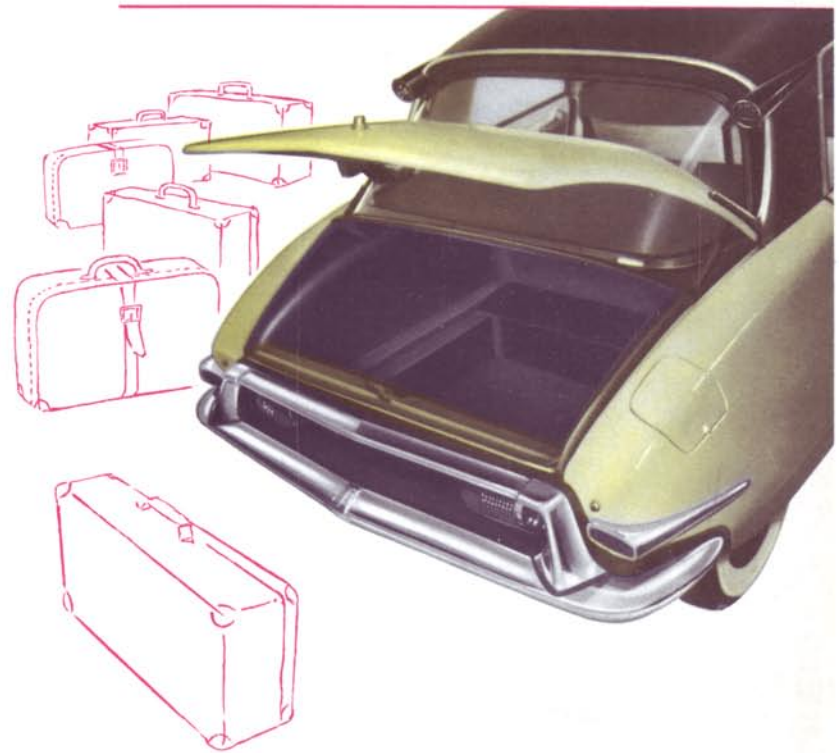

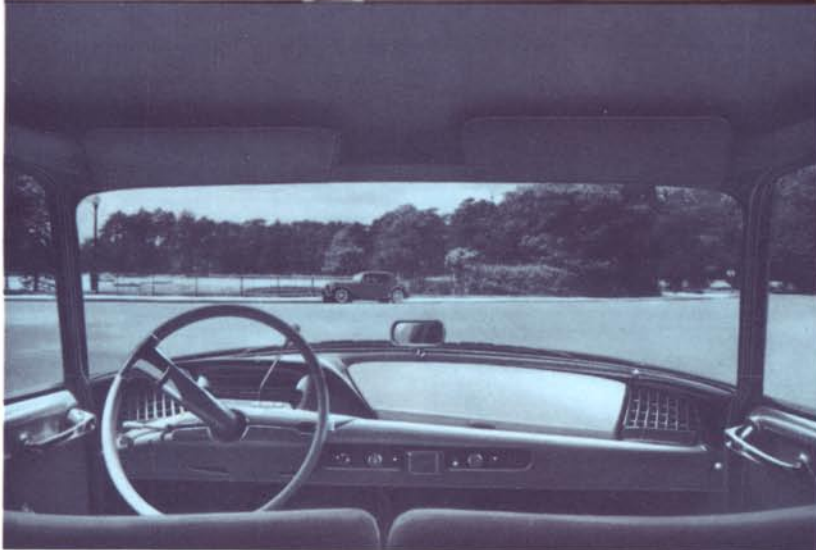

Trunk: 17.5 cubic feet — more than enough room to accommodate all suitcases normally needed for a long trip.

PERFORMANCE

The roadability of Citroen insures an average cruising speed of 70 miles per hour with a top speed of over 90 m.p.h.

Within the DS 19 you enjoy lounge chair comfort on the road. Whatever the weather or the road conditions — in either the front or rear seats — you can read, write, sleep or enjoy the landscape with the utmost ease. No matter how long the trip, the DS 19 gives you fatigue-free driving. For the driver who is in a hurry, the DS 19 combines the highest degree of speed and safety.
